

SERC Botany Scavenger Hunt!

Directions: Working in teams of 2-3 students you must complete the following scavenger hunt. Remember, watch out for poison ivy! Please do not pick, crush, or destroy any of the plants you are looking for! We want to leave as little impact as possible on SERC's beautiful forests. Check the box beside each task when you've found what you're looking for. Once you have completed your hunt return the page to the SERC educator to be checked.

Find 3 Different Types of Vines Find a nut or acorn from a tree

Locate the vine and leaves of poison Ivy (Hint: the vine is hairy, and the plant has 3 leaves) **DON'T TOUCH!**

A tree with opposite leaves (Hint: leaves right across from each-other)
