

WHAT ARE MICROBES?

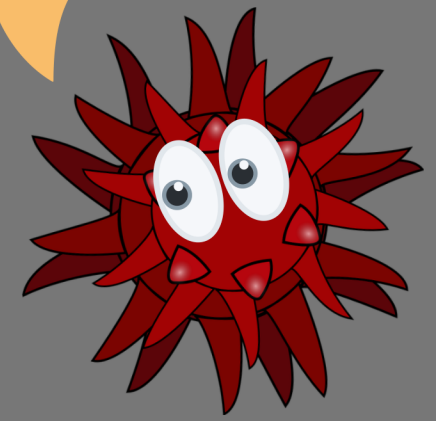

Tiny organisms that you cannot see with your naked eye

Bacteria Fungi
Viruses Archea
Algae Protozoa

WHERE ARE MICROBES?

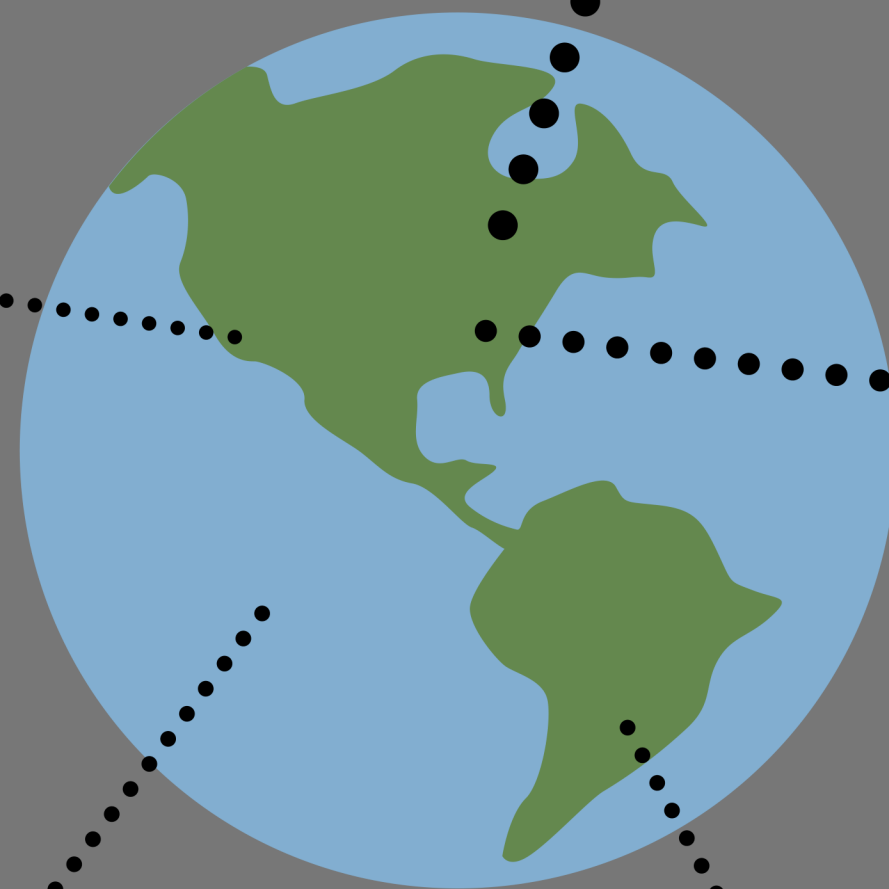

Everywhere!

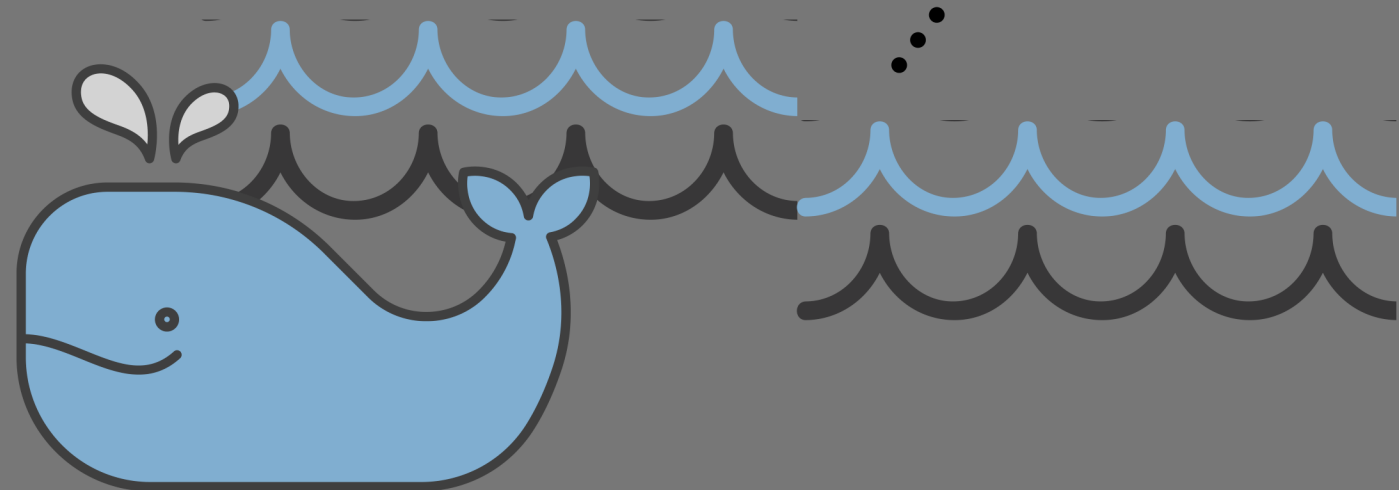

On and in your body!

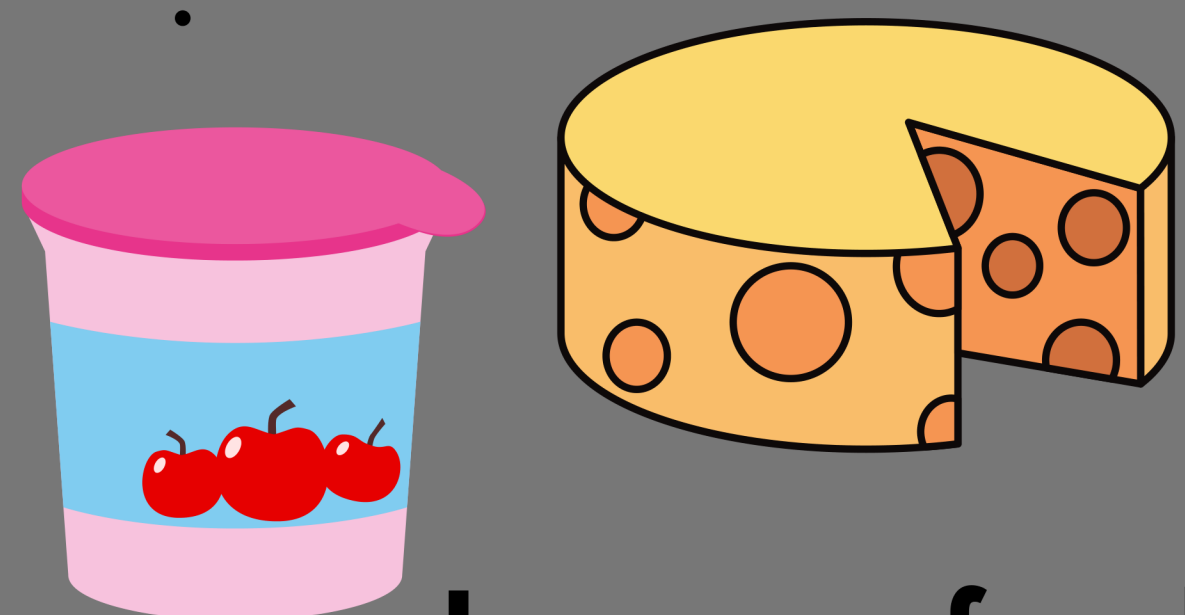

On the tallest and coldest mountains

On all surfaces inside and outside your house

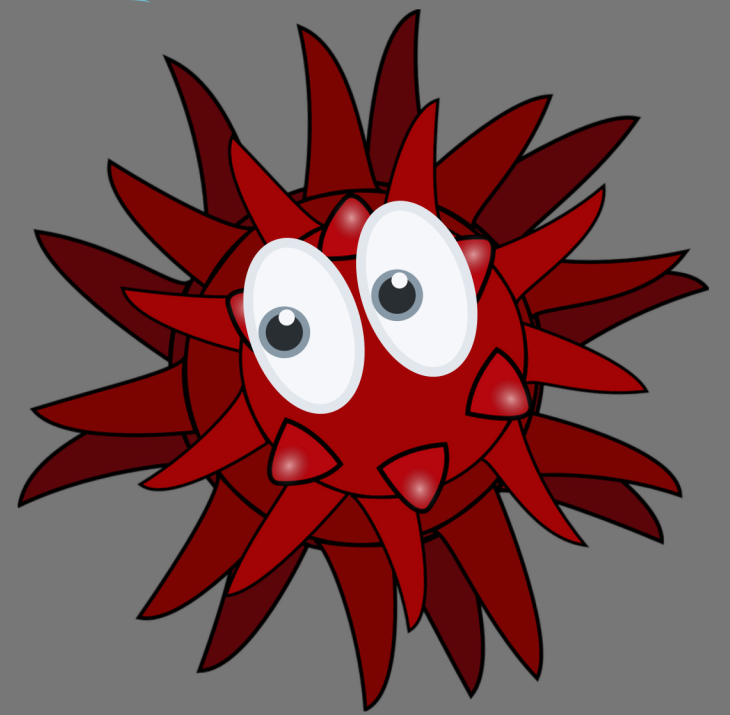

On all animals and plants, even on the surface of the ocean to the ocean floor

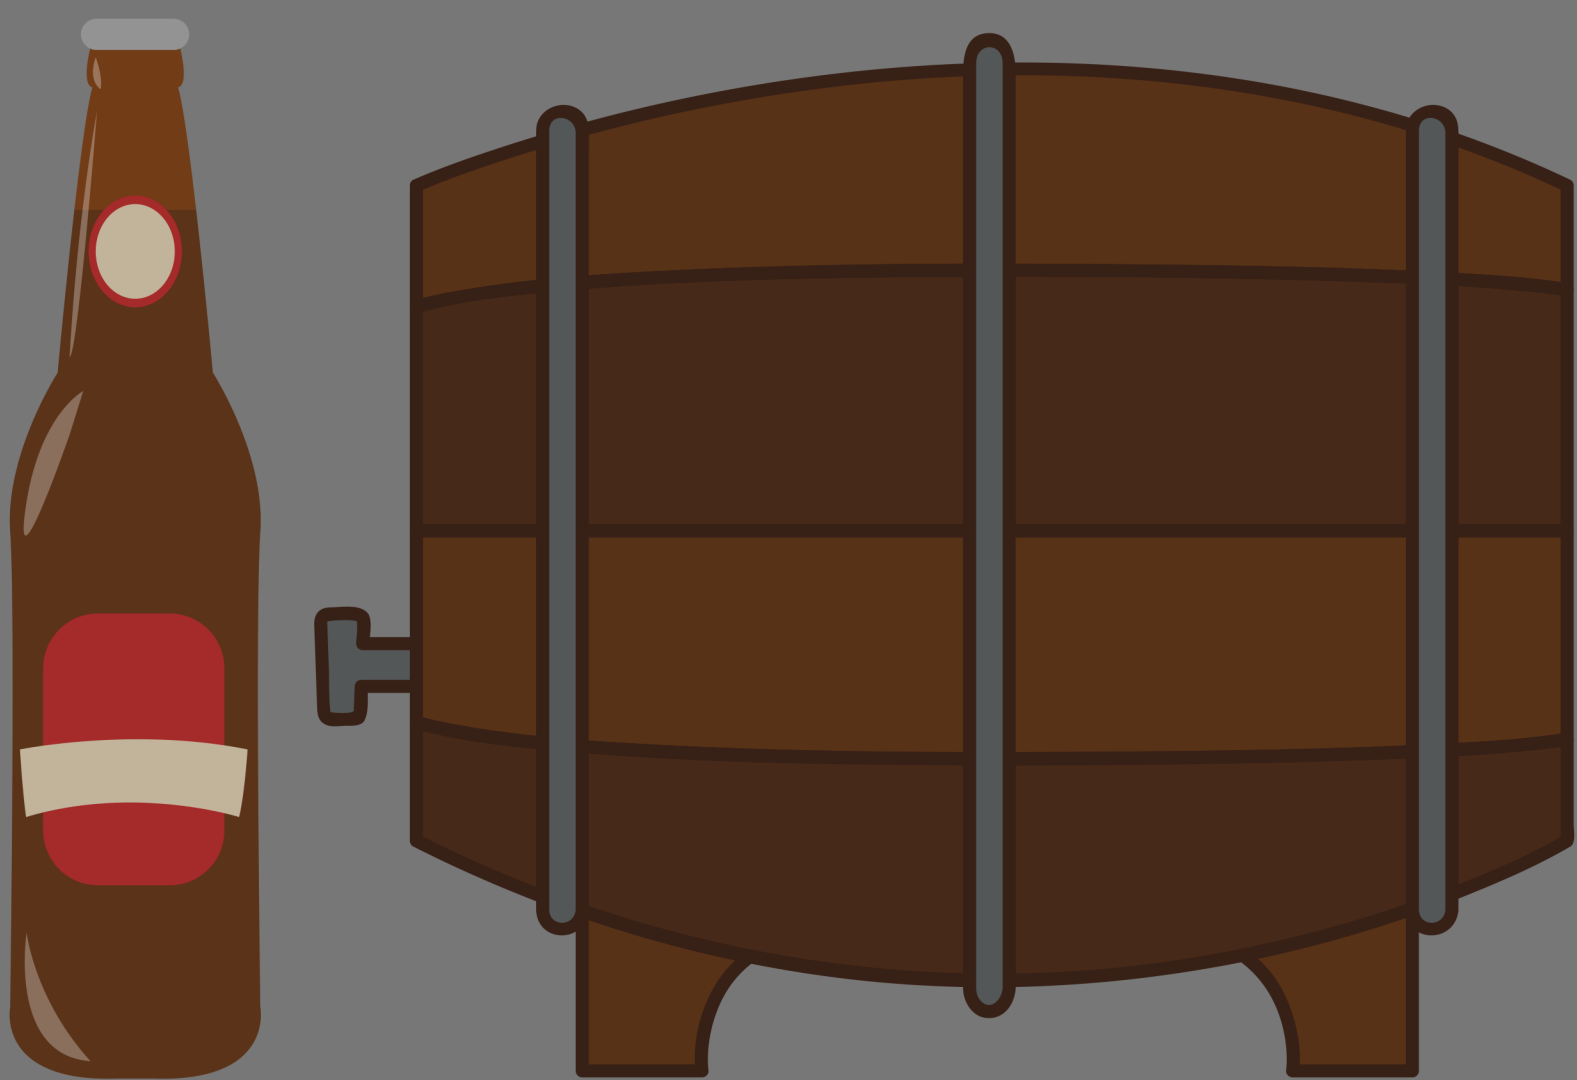

In some food like cheese and yogurt

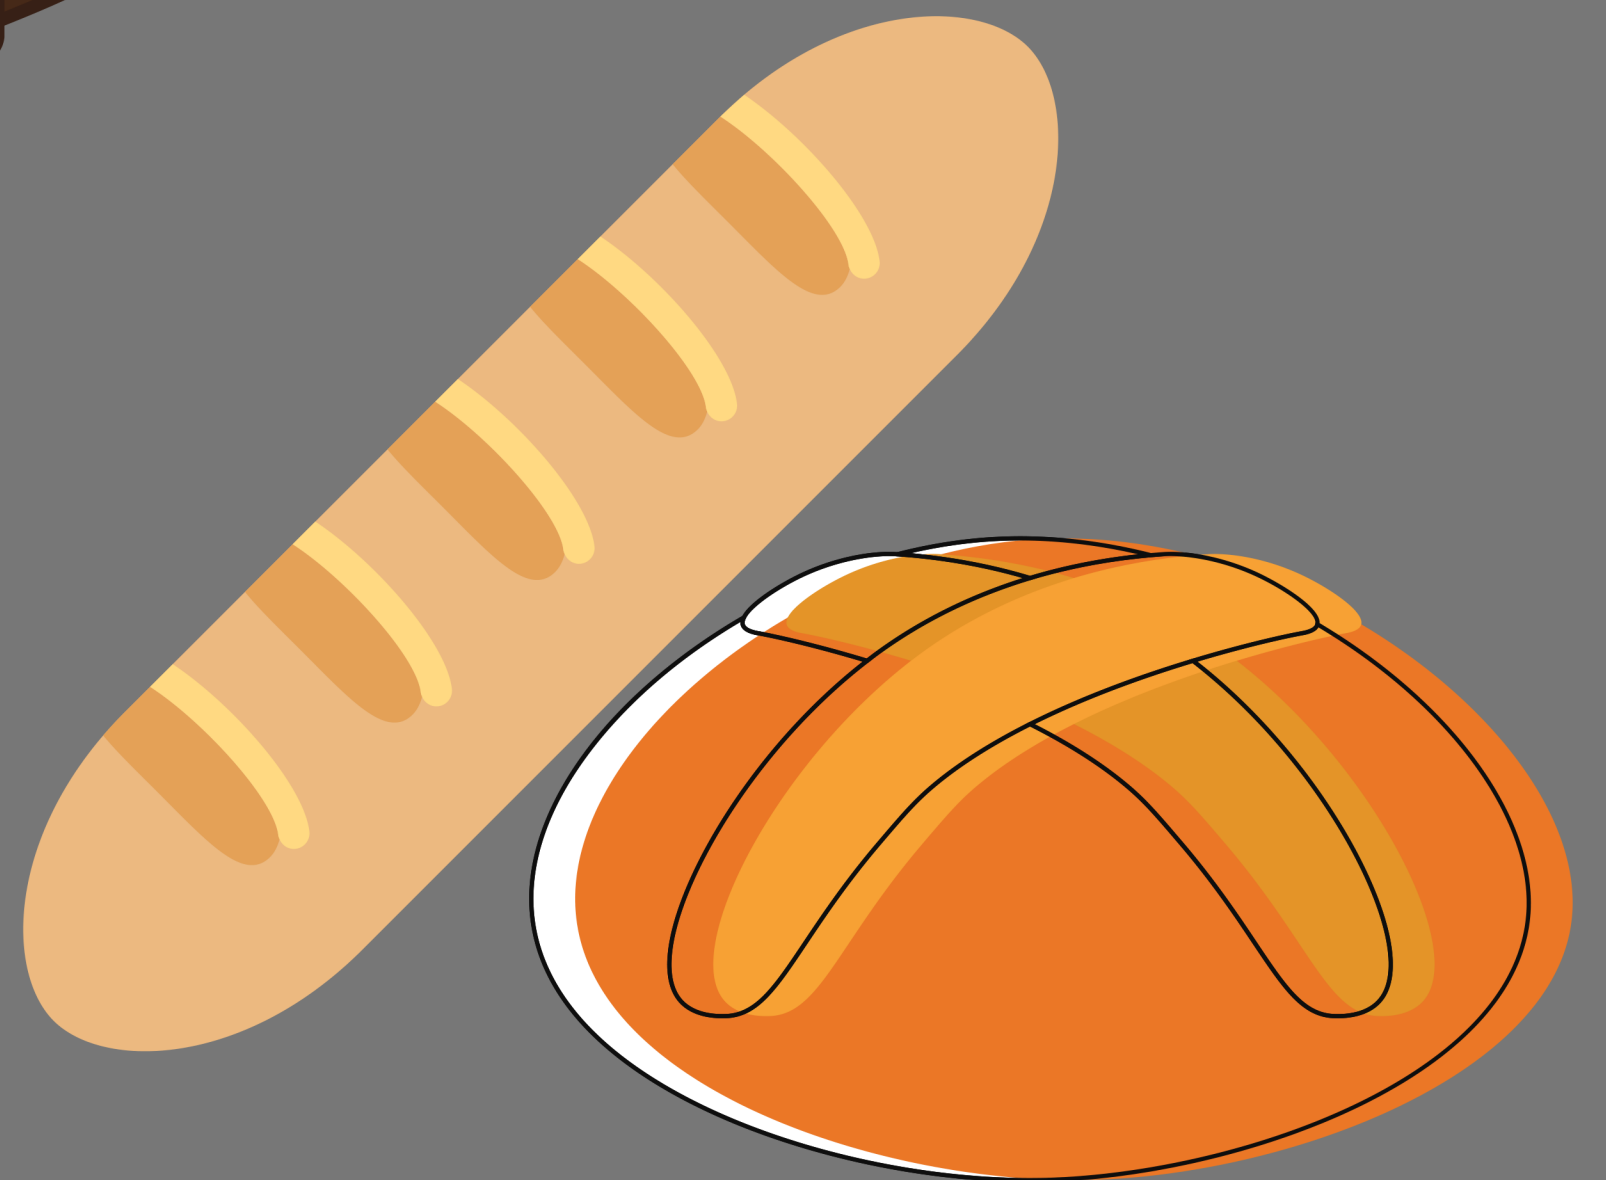

HELPFUL MICROBES

**Yeast to make beer/
wine**

**Yeast to
make breads**

**Bacteria to
make yogurt/
cheese**
